

Recently, a few of our own TBG Members/Owners provided hope for a family that was so desperately in need of help. The popular TV show, Extreme Home Makeover, selected the Swenson family due to their unique situation. In order to help make this project a reality, TBG Members/Owners performed the General Contracting duties along with other essential building tasks for this major project.

Without hesitation, Erik and Vicki Swenson took in their four nieces and nephews after the children's mother was tragically murdered. Shortly this family will be totaling ten with the addition of the Swenson's fourth child by the end of the year. They were in serious need of expanding their modest three bedroom house to a home worthy of the sacrifices made to help give the children a chance to succeed after bearing witness to such a horrific event.

Thanks to a few of our members, plus countless other volunteers, the Swenson-Lee Family are the proud new owners of a spacious seven bedroom, five bathroom home that was completed in a blistering timeframe of under a week. This all comes at a time of a rather slow residential market which clearly shows the heart and compassion of the members that donated their time and effort. "Thanks" is also due to all of the other wonderful people that helped in the overwhelming success of this project including the volunteers, partners, and participants alike. This particular situation speaks volumes for the membership at TBG. We at TBG are very fortunate to have Members/Owners that are willing to put other's needs before their own. To show our appreciation at TBG, we made a donation of \$750 to help with the costs associated with the undertaking of such a monumental project.

We would like to extend our deepest appreciation to TJB Homes and other Members that participated for the sacrifices they made to make sure that this tragic situation has a happy ending.
